

HiWi in AI-Radar-Team

AG Roskos (Ultrakurzzeitspektroskopie und Terahertz-Physik)

Topic:

- Automotive radar sensors
- Artificial intelligence
- Your tasks:
 - Design radar antenna
 - Use AI/ML to improve the antenna design
 - Use AI/ML to improve the data processing for radars

- Time: 40h/Month (flexible)
- Begin from September (flexible)
- Master

Helpful knowledge (not obligatory)

- 60/77 GHz industrial or automotive radar
- Radar algorithm development
- ML/AI models
